# How to install EOS v.3 plus

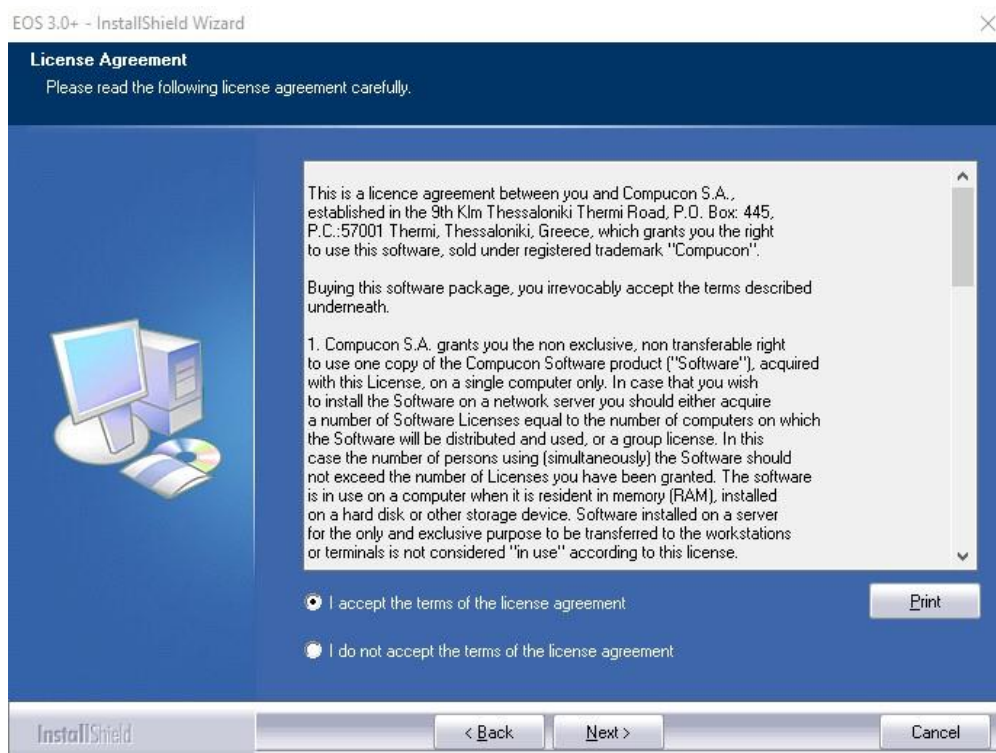

- 1) Download the installation files from:  
[https://www.wavenet.gr/wavenet\\_downloads/EOS\\_v3\\_plus/EOS\\_v3\\_plus.zip](https://www.wavenet.gr/wavenet_downloads/EOS_v3_plus/EOS_v3_plus.zip)
- 2) Unzip the installation files
- 3) Double click on the file "setup.exe"

- 4) Click Next

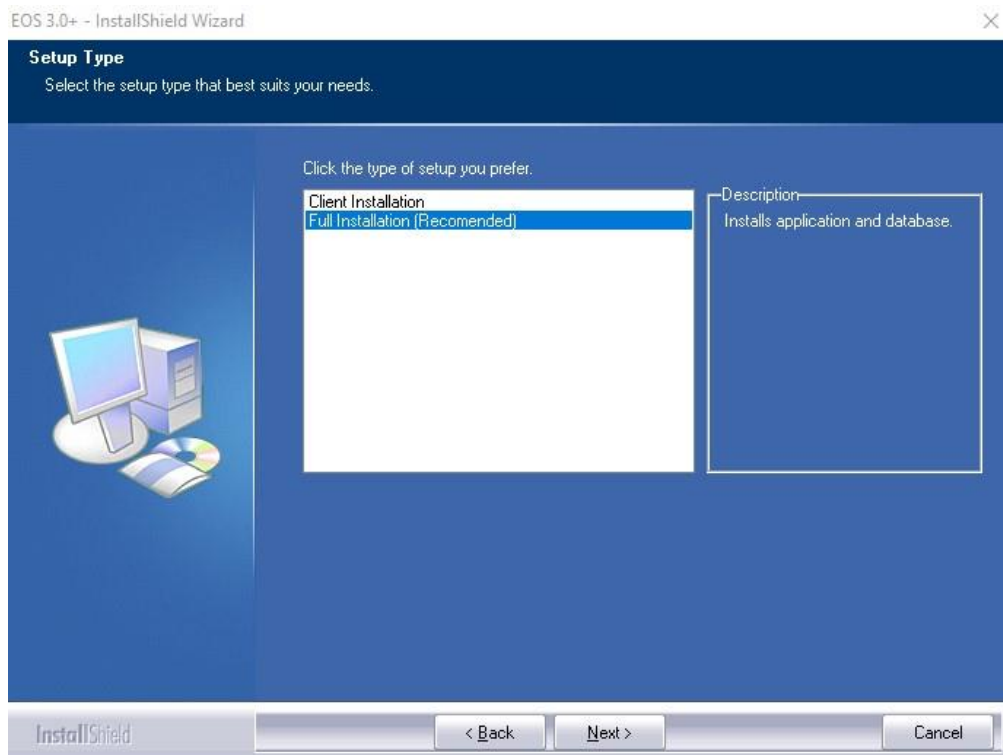

- 5) After reading and agreeing with terms given in the License Agreement, please click on "Next"

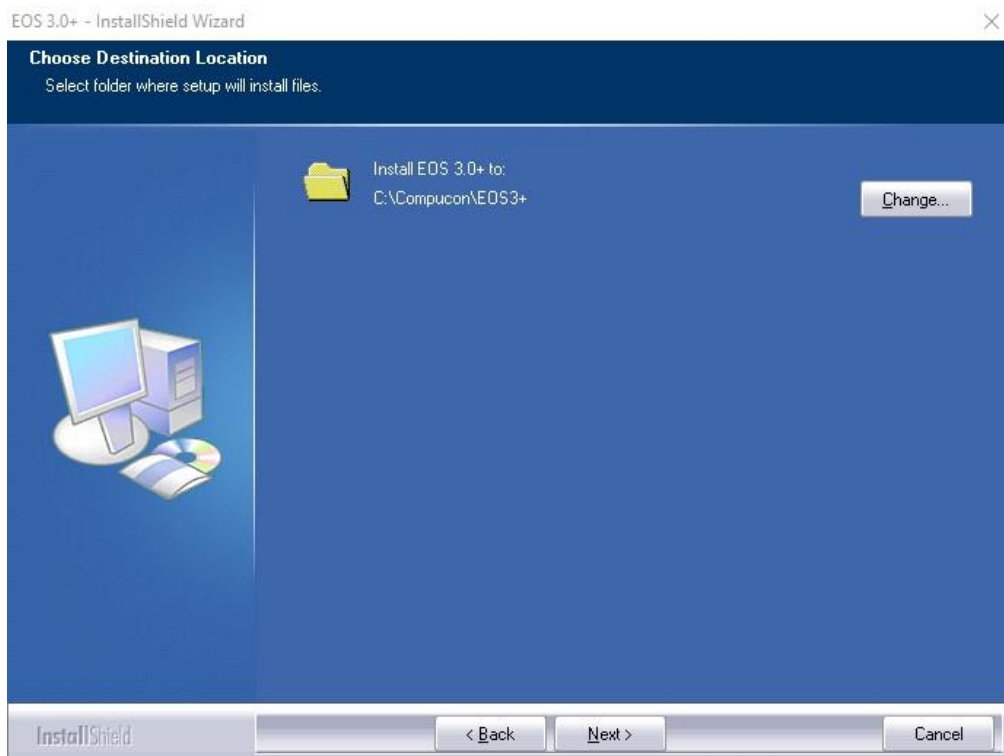

- 6) Now input your User Name and Company Name (if there is no "Company Name", insert any character)

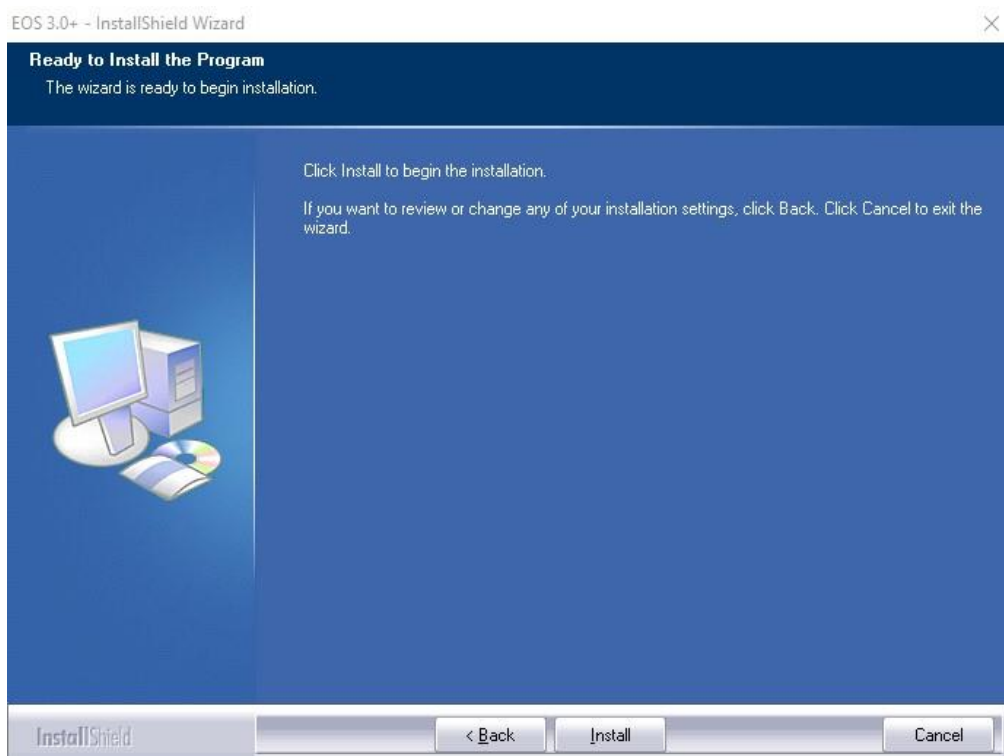

- 7) At this point you are prompted to select what type of setup should be performed, "Client Installation" or "Full Installation". The difference between these two types of installation is that in the case of the "Full Installation" both the main software application and the Database (optional) is installed, whereas the "Client Installation" requires previous installation of the Database. It is advised to choose "Full Installation" and just skip the Database later on if you won't use it

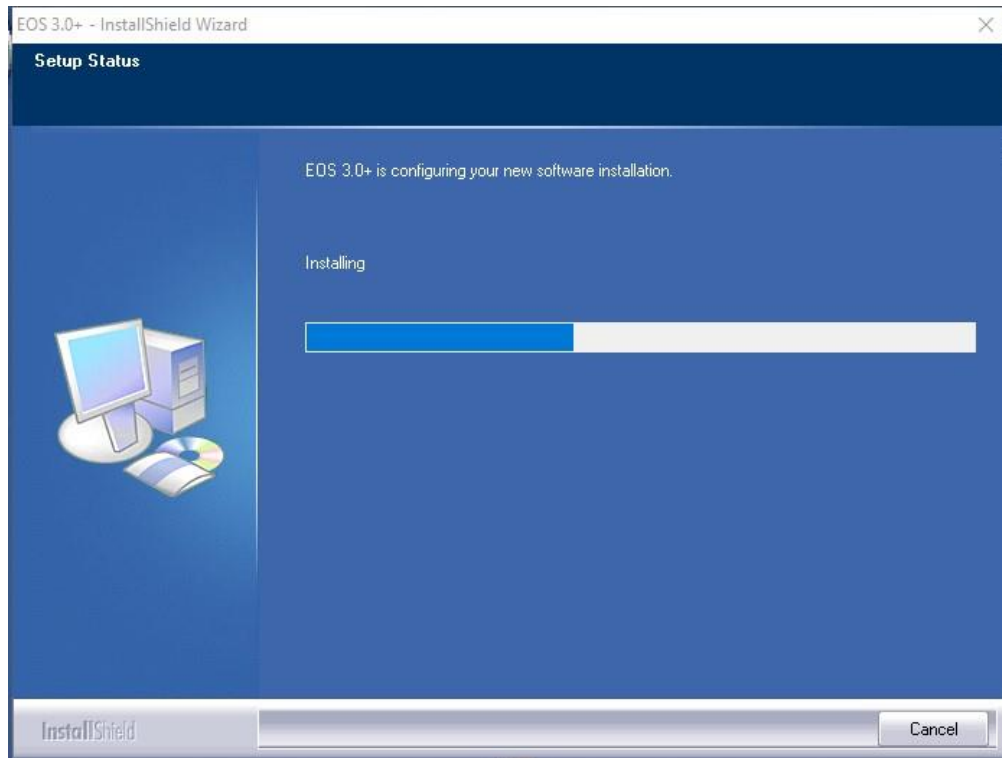

- 8) Select the directory where the software should be installed. It would be recommended to use the default selected directory:  
C:\Compucon\EOS3+

- 9) The installation procedure has all necessary information to start. Click on the "Install" button to start

- 10) The progress bar will indicate the stage of all files being installed, the procedure of installing the EOS software application will finish when the bar is close to the end

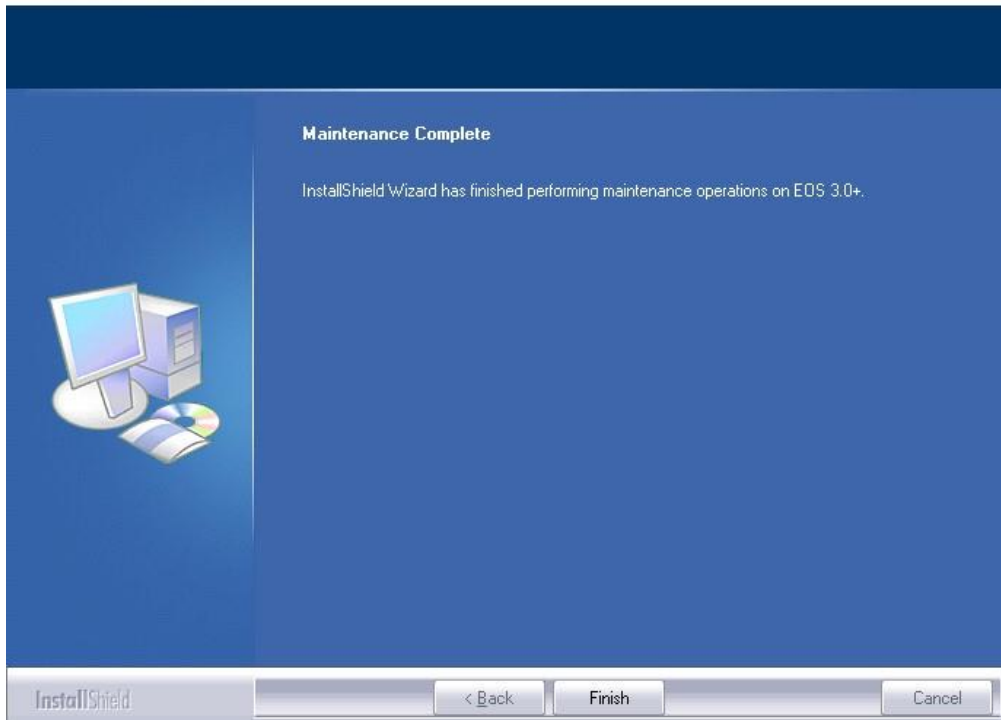

- 11) Choose if you want to install the Database (Optional)

- 12) As a last step, you are prompted to click "Finish" in order to complete the installation procedure. If the installation utility identifies a lack of available space on your hard disk, an error message will prompt you to free some hard disk space before proceeding with the installation. You can always abort the installation procedure by clicking on "Cancel"

EOS 3.0+ - InstallShield Wizard

- 13) Once the installation finishes run EOS 3+ shortcut. The first time the software opens up, you will need to register your license. In the following registration dialog, fill in your information. Fields with an asterisk (\*) are required. If you skip any of the required fields, the registration will be rejected. Make sure you don't make any mistakes

Dialog

For activation via the internet Click "Activate". For activation via email click "Save" and email us the file that will generate at [embsupport@wavenet.gr](mailto:embsupport@wavenet.gr). When you receive the activation file from us click "Load" to browse the file and then "Activate".

If you haven't purchased an activation code yet you can use the Demo version which does not have the ability to save.

Identification

Salutation:  First Name: \*  Last Name: \*  Company:

Contact

Phone:  Fax:  EMail: \*

Address

Address:  City:  State/Province:  Zip:  Country: \*

Activation code

Activation code : \*

You will find your activation code inside the "EOS v.3 plus License 6000XXXXX.pdf" document that you have received when you bought the software. You can copy and paste or just type it. It looks like this:

<b>Product</b>	EOS v.3 plus
<b>Level</b>	Pro Elite
<b>Activation Code</b>	XXXXXXXXXXXXXXXXXXXXXX
<b>Serial Number</b>	6000XXXXX

After filling in all information, including the activation code, you can either activate your product via the internet, or offline.

## Activating via the internet

First fill in all the fields. Then copy and paste or type the activation code. Finally click on "Activate" button as shown below:

Dialog

For activation via the internet Click "Activate". For activation via email click "Save" and email us the file that will generate at [embsupport@wavenet.gr](mailto:embsupport@wavenet.gr). When you receive the activation file from us click "Load" to browse the file and then "Activate".

If you haven't purchased an activation code yet you can use the Demo version which does not have the ability to save.

Once you click on activate, the software verifies that the license is valid. After that you will see the following window:

Click "OK" and the software will restart automatically.

The new key has been installed successfully!

You can verify that the new key was installed, by going to Menu "Help" – "About":

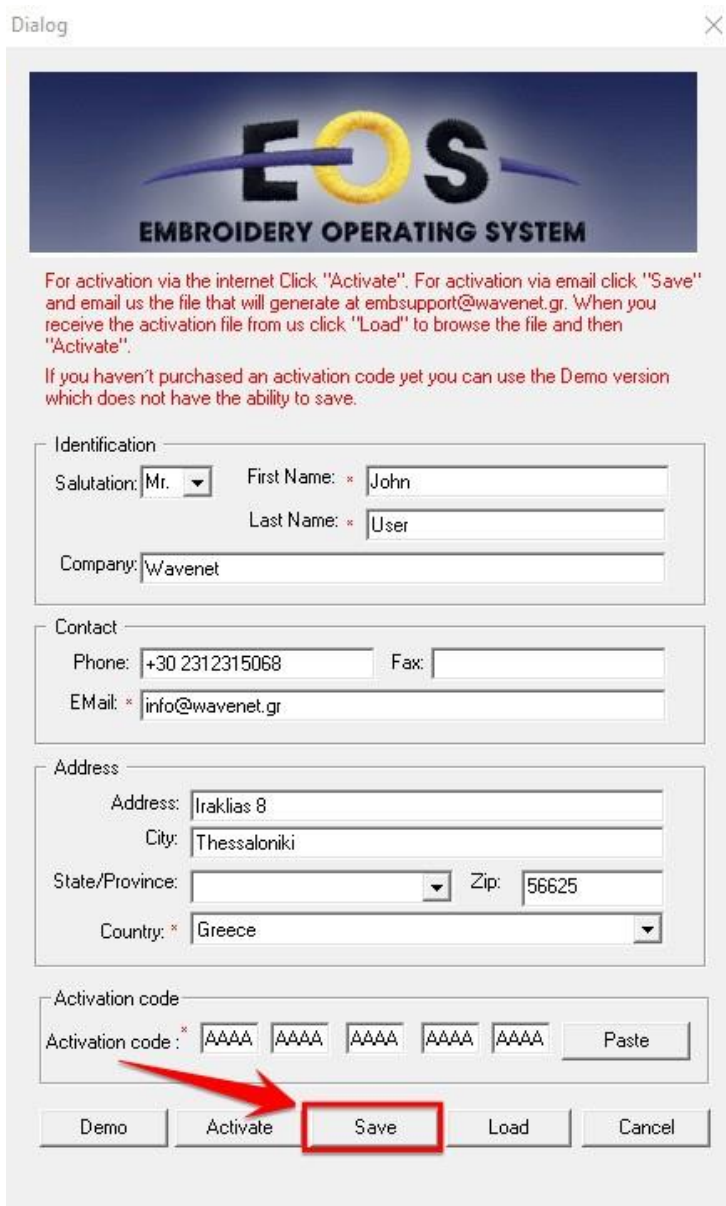

The product level must be what you have bought, for example mine is "Pro Elite".

Also, here you can see the Serial Number of this license.

## Activating offline

If you do not have an internet connection in the computer you want to install EOS v.3+ to, you can follow below procedure:

After following all steps like activating online, instead of clicking "Activate", you click on "Save":

The dialog box is titled "Dialog" and features the EOS logo at the top. Below the logo, there is instructional text in red: "For activation via the internet Click 'Activate'. For activation via email click 'Save' and email us the file that will generate at [embsupport@wavenet.gr](mailto:embsupport@wavenet.gr). When you receive the activation file from us click 'Load' to browse the file and then 'Activate'." Another line of red text states: "If you haven't purchased an activation code yet you can use the Demo version which does not have the ability to save."

The form is divided into several sections:

- Identification:** Includes fields for Salutation (dropdown menu with "Mr." selected), First Name (text box with "John"), Last Name (text box with "User"), and Company (text box with "Wavenet").
- Contact:** Includes fields for Phone (text box with "+30 2312315068"), Fax (text box), and EMail (text box with "info@wavenet.gr").
- Address:** Includes fields for Address (text box with "Iraklias 8"), City (text box with "Thessaloniki"), State/Province (dropdown menu), Zip (text box with "56625"), and Country (dropdown menu with "Greece" selected).
- Activation code:** Includes a field for the activation code (text box with "AAAA AAAA AAAA AAAA AAAA") and a "Paste" button.

At the bottom of the dialog, there are five buttons: "Demo", "Activate", "Save", "Load", and "Cancel". A red arrow points to the "Save" button, which is also highlighted with a red rectangular box.

A file will be saved in your computer, in the location you choose. This file has a ".wavact" extension. You need to email this file to Wavenet at [embsupport@wavenet.gr](mailto:embsupport@wavenet.gr). Wavenet will email you back an activation file with a ".wavkey" extension. You need to open registration dialog again and load the wavkey file:

Dialog

For activation via the internet Click "Activate". For activation via email click "Save" and email us the file that will generate at [embsupport@wavenet.gr](mailto:embsupport@wavenet.gr). When you receive the activation file from us click "Load" to browse the file and then "Activate".

If you haven't purchased an activation code yet you can use the Demo version which does not have the ability to save.

Activation code

Activation code : \*

After that the activation will proceed as described in the activating online section above.

## Using Demo version

EOS v.3+ has a Demo version. Demo version is Pro Elite level, so it has all the functionality enabled, but you cannot save or transmit to machine.

If you already have a Demo version installed, and bought a license, you don't need to re-install. You just need to input the activation code in the registration dialog which you can access from Menu "Help " – "Register your software", and your Demo version will become full version.

In order to use the Demo version, just click the button "Demo" in the registration dialog:

Dialog

X

For activation via the internet Click "Activate". For activation via email click "Save" and email us the file that will generate at embsupport@wavenet.gr. When you receive the activation file from us click "Load" to browse the file and then "Activate".

If you haven't purchased an activation code yet you can use the Demo version which does not have the ability to save.

Activation code

Activation code: \*  Paste  

Demo Activate Save Load Cancel

You don't need to fill in any fields at all.

## Your Wavenet embroidery software account

Once you successfully activate EOS v.3 plus, you will receive an email, which will prompt you to specify a password for your Wavenet embroidery software account. Follow the instructions and set your desired password. Make sure to also check in your "Spam" folder, in case your email provider falsely marks it as spam. If you don't receive the email, go to [embservices.wavenet.gr](mailto:embservices.wavenet.gr) and click on "Let's recover" password prompt. Fill in your email address and Wavenet will resend the email to you. Please note that you must use the same email address you used when activating the software in the Registration Information window.

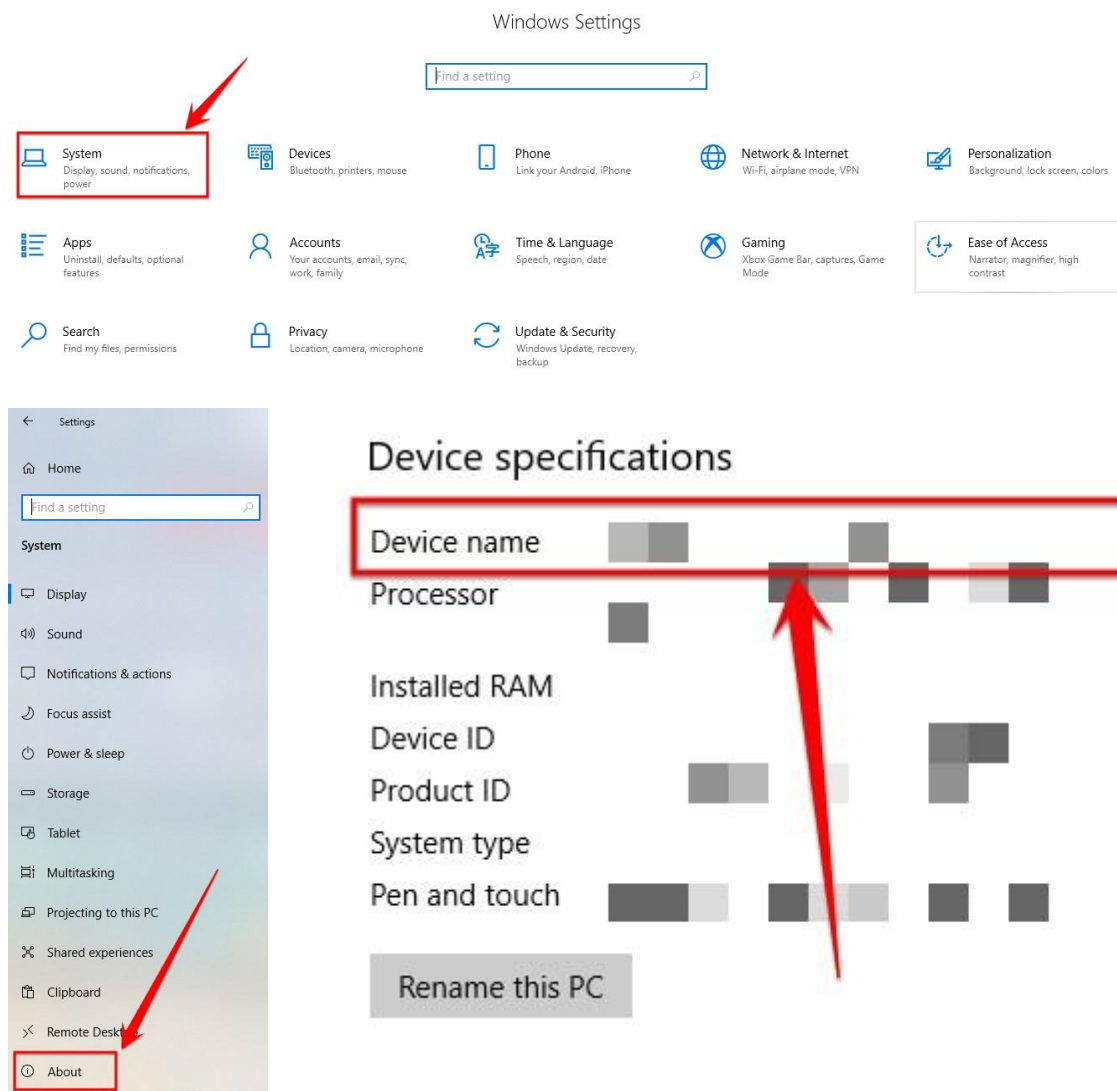

From your Wavenet embroidery software account, you can easily manage the computers your software is installed, and move your license to a new computer if needed. After you login, you will see the following window. Check on the computer names that the software is install, and just click on the "x" mark to delete the license from a computer. Now you can move your license to a new computer. It's that easy!

In Windows 10, you can check your computer's name by going to "Windows Settings" – "System" – "About" – "Device name" as shown below:

## Important Notes

- ✓ You can activate EOS v.3+ in up to 2 different computers at the same time with one license (limitations apply to multi-license users) All the registration info (name, email etc) must be the same in both computers when registering, so it is really important to avoid mistakes
- ✓ If you want to activate EOS v.3+ to more than 2 computers you must buy extra licenses
- ✓ If you already have EOS v.3+ activated in 2 computers and want to move the license from one of the 2 computers to a third computer, you can do so easily from your Wavenet embroidery software account at [embservices.wavenet.gr](http://embservices.wavenet.gr)
- ✓ EOS v.3 and EOS v.3+ installation files and update files are not compatible. That means if you already have v.3 and upgrade to v.3+ you will have to re-install the software.
